Day 1

Afternoon

Wrap-up

Homework

- Read about the 2 types of Carpentry workshops
  - Self-organised - http://datacarpentry.org/self-organized-workshops/
  - Centrally-organised - http://datacarpentry.org/workshops-host/
  - These summarise commonly asked questions about running workshops
- Then tomorrow morning...
  - Add one question on workshop operations to Googledoc
- Read up on the instructor checkout procedure; we'll cover questions tomorrow
  - http://carpentries.github.io/instructor-training/checkout/

Homework

- Prepare for live coding exercise
    - Pick and read through episode from Software/Data Carpentry
    - Tomorrow morning, use to practice live coding for 3 minutes in groups of three
    - Comment on delivery and content

Day 2 Feedback

Good

To be improved

Reflecting on the Day

Take 5 minutes to think over everything we covered today.

Write down something that captures what you want to remember about the day. The Trainers won't look at this - it's just for you.

If you don't know where to start, consider the following list for a starting point:

- *Draw a concept map, connecting the material*
- *Draw pictures or a comic depicting one of the day's concepts*
- *Write an outline of the topics we covered*
- *Write down one thing that struck you the most*

This exercise should take about 10 minutes.
