

I like chemistry and want to work in the chemical industry!

...school

Physical Science Degree

OK, I am rubbish at experimental chemistry and good at maths.

I like computational chemistry and want to do research

Looking after the computers and software is cool but this Ph.D. is no good; lets try working in the real world!

Ph.D.

Partner is in Edinburgh – any postdocs with computational chemistry up there?

The real world sucks, lets try a more interesting Ph.D.

Postdoc Researcher

Arrggh! My fixed term contract is ending find another one quick!

Cool job doing software for chemists but Uni does not have a clue what it means ... contract ending ...

RSE Position

(Existential crisis #1) I enjoy programming more than research, what can I do?

(Existential crisis #2) Why don't I fit? Why is my role not valued more? Where do I go from here?

RSE career...
